12th Grade

5th Grade

Deep Patel

Deep has joined SR since his 5th grade, till 11th grade. He resided about an hour away from Storming Robots. Sincere gratitude to his parents' trust in the value of SR's program and making all the weekly long trips to SR.

Hello Ms. Elizabeth,

I got accepted into Carnegie Mellon University's School of Computer Science for the Class of 2024! SCS at Carnegie has been a big dream of mine since I began my college admissions process, and I am super excited to have achieved it, knowing that I have an exceptional place for me in my future.

But more importantly, I would like to thank you, for without introducing me to programming when I was in 5th grade, I am absolutely certain that I never would have reached this great of an achievement.

It was the program that you began that got me interested into computer science, that taught me what an algorithm was. Even as a high school student, programming has become a huge part of my life. By pursuing computer science-related activities, I have met amazing friends, bonded with awesome teachers, and even programmed and published my first app! Programming has given me such an awesome experience in my life, and I am sure that it will bring so much more in my future.

Yet, I could not have done any of it without the amazing vision that you had for teaching children your knowledge of computer science, and I am so extremely grateful that I cannot fully express it in an email, but with all of my heart, thank you. Thank you so much for shaping me into the person who I have become today.

Best regards,
Deep Patel
