SUMMER
## Enrichment
6/26 to 8/25— Full or Half Day Schedule

Enhance your Robotic Engineering and Programming w/ Computational Skill over the Summer Break...

REGISTER NOW

SUMMER ENRICHMENT

Allow students to reach their full potential.

Progressive Levels from Level B up to III.

Available week 1 to 7 (6/26 to 8/25)
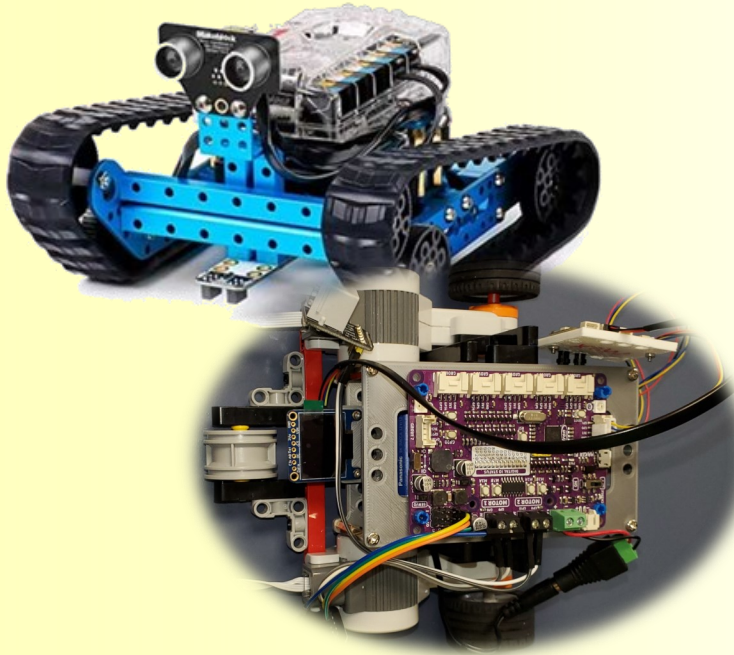

Rising Gr.5-8

Robotics Projects

Get a head start for robotics activities during the school year.

Rising Gr.8+

Programming *With Computational Thinking*

Sharpen your analytical skill with software development. Enhance your foundation in robotics automation.

Special One-week Robot Workshops

Take home robot
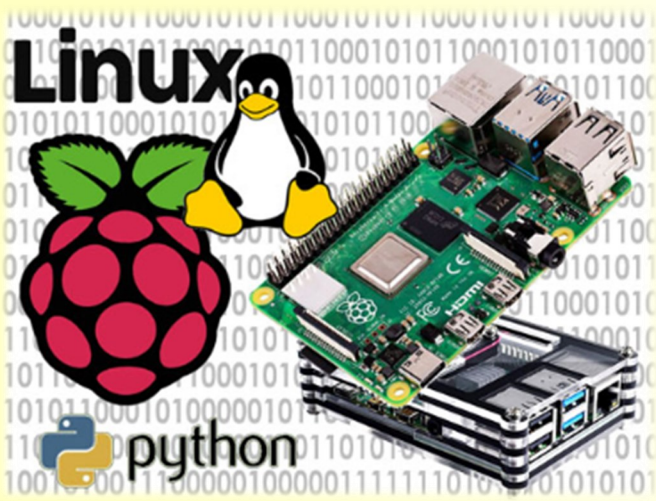

Rising Gr.6-8

Ranger Transformable Robot

Beyond LEGO.
Prerequisite: Proficiency in Robotics Projects Level I.

Rising Gr.8+

Robotics & Electronic—B

Use open-source robotics platform with Arduino. Prerequisite: Proficency in Robotics Projects Level II.

Computer Vision

Enables computers to understand the visual world

Important concept in STEM, espcieally in artificial intelligence realm.

Two-week Workshop

Rising Gr.8+

Raspberry PI + Computer Vision

Prerequisite: Proficiency in Algorithms in C/C++ - Level I.

Great way to cover challenges required in most of robotics competition, and independent project.

American Computer Science League

ACSL

Two week online program.

Computer Science Competition Clinic

Rising Gr.8+

American Comp. Sci. League

Prerequisite: Proficency in Algorithms in C/C++ - Level I.

Enhance your skills in ACSL Competition participation during the school year.

ZeroRobotics

By MIT/NASA

ZERO ROBOTICS
ISS PROGRAMING CHALLENGE

Middle School Competition

Five weeks Hybrid classes—June 26 to end of July.

Rising Gr.6-8

Satellite Programming Competition

Prerequisite: High proficency in Robotics Projects—Level I.

By invitation ONLY. Students will receive invitation via email. If you are interested, and have met the prerequisites—contact office@stormingrobots.com
